Power Sources

To a wall outlet

AC power cord (supplied)

VARNING

To reduce the risk of fire, do not cover the ventilation opening of the appliance with newspapers tablecloths, curtains, etc. Do not expose the appliance to naked flame sources (for example lighted candles)

To reduce the risk of fire or electric shock, do not expose this apparatus to dripping or splashing, and do not place objects filled with liquids, such as vases, on the apparatus.

As the main plug is used to disconnect the unit from the mains, connect the unit to an easily accessible AC outlet. Should you notice an abnormality in the unit, disconnect the main plug from the AC outlet

The unit is not disconnected from the AC power source (mains) as long as it is connected to the wall outlet, even if the unit itself has been turned off. Do not install the appliance in a confined space, such as a bookcase or built-in cabinet. Excessive sound pressure from earphones and

Do not expose the batteries (battery pack or batteries installed) to excessive heat such as

Connect the AC power cord A, or insert six R14 (size C) batteries (not supplied) into the battery compartment B.

Α

• When using the radio on batteries and the battery power drops to a certain level, the OPR/BATT indicator 15 dims or power of the radio may go off during playback. If this happens, replace all the batteries with new ones. Even after the OPR/BATT indicator

atteries, be sure to remove any CD and disconnect any USB devices or optional components from the unit.

This unit is equipped with an automatic standby function. With this function, the unit enters standby mode

To turn standby mode on or off, press VOL -4 while holding down TUNE + 8. Each time you press the buttons,

• In the DAB function, if "NOSIGNAL" or "OFF-AIR" remains displayed for 15 minutes, the unit enters standby mode automatically.

• To use the unit on batteries, disconnect the AC power cord from the unit and the wall outlet.

To use the power-management function (European models only)

automatically after about 15 minutes if there is no operation or audio signal output.

• The displayed content starts flashing on the display about 2 minutes before entering standby mode

• In standby mode with the AC power cord connected, "STANDBY" appears on the display.

"AUTO STANDBY ON" or "AUTO STANDBY OFF" appears on the display.

• The automatic standby function is not available with the FM function

15 becomes dim. you can use the radio function for some time, although you cannot use the CD player. Before you replace the

* In program play mode, playback starts from the first programmed track/file

To cancel the Resume Play, press **12** while the CD is stopped.

Do this

Resume Play is cancelled in the following cases: - When you open the CD compartment. - When you turn off the power.

Example of folder structure and playing order The playing order of the folders and files is as follows. However, the playing order may differ from

Notes on MP3/WMA discs

- When a disc is loaded, the unit reads all the files on that disc. During this time, "READING" is flashing. If there are many folders or non-MP3/WMA files on the disc, it may take a long time for play to begin or for the next MP3/ WMA file to start to play. • We recommend that non-MP3/WMA files or unnecessary
- folders are excluded when creating MP3/WMA discs. • During playback, audio files other than MP3 and WMA
- files are skipped even if those files are included in a folder. • The audio formats supported by this unit are as follows:
- WMA: File extension ".wma" Note that even if the file name has the correct file extension but the actual file was created in a different audio format, this unit may produce noise or may malfunction.
- MP3 PRO format is not supported.

MP3: File extension ".mp3"

- WMA files encoded in WMA DRM, WMA Lossless and WMA PRO formats cannot be played back. • This unit cannot play audio files on a disc in the following
- When the total number of audio files exceeds 999 - When the total number of folders on a single disc exceeds 256 (including the "ROOT" folder
- When the directory level (folder depths) exceeds 8 (including the "ROOT" folder). • Folder names can be displayed with up to 32 characters,
- including quotation marks. File names can be displayed with up to 32 characters,
- including quotation marks and file extension • Characters and symbols that cannot be displayed by the
- unit will appear as "_"
- This unit conforms to version 1.0, 1.1, 2.2, 2.3 and 2.4 of the ID3 tag format for MP3 files and the WMA tag format defined by the ASF specification (Advanced Systems Format) for WMA files. When a file has the ID3 or WMA tag information, the song title, artist name, and album name will be displayed. If a file does not have the tag information, the unit displays as follows
- File name instead of the song title.
- "NO ARTIST" message instead of the artist name. "NO ALBUM" message instead of the album name. ID3 and WMA tag information can be displayed up to 64

You can listen to audio files stored on a USB device (a digital music player or USB storage media). Audio files in MP3, WMA and AAC formats* can be played on this unit.

Files with copyright protection (Digital Rights Management) cannot be played on this unit

Compatible USB devices

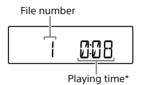

Comparability requirements for the USB devices are as follows. Before using a device with this unit, check that it meets the requirements.

- Compliance with USB 2.0 (Full Speed)
- Supports Mass Storage mode*
- * Mass Storage mode is a mode that allows a USB device to become accessible to a host device, enabling file transfers. Most USB devices spoort Mass Storage mode.
- 1 Connect the USB device to the (USB) port 11. 2 Press USB 13 to turn on the USB function. The volume label is displayed once, then the total number of folders appears on the display

Total number of folders

3 Press ►II 12 to start playback. The folder name and song title are displayed, and then the file number and playing time appear.

* If the playing time is longer than 100 minutes, "--:--" appears on the display

Other operations

То	Do this	
Pause playback	Press ►II 12. To return to playback, press the button again*1.	
Stop playback	Press ■ 12. When you press ▶11 12 after playback is stopped, playback starts from the point where you stopped playback (Resume Play)*2.	
Select a folder	Press 🗀 + or − 🔞.	
Select a file	Press I◀◀ or ▶▶ 7. You can skip files one by one. To skip files continuously, hold down I◀◀ or ▶▶ 7 and release the button at the desired file.	
Find a point in a file (fast forward/ rewind)	Hold down I ✓ or ►► 7 during playback, and release the button at the desired point. When locating a point while paused, press ► 11 12 to start	

playback after the desired point is found. *1 When playing a VBR MP3/WMA/AAC file, playback may

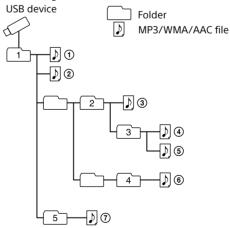

restart from a different point. *2 In program play mode, playback starts from the first

programmed file.

When removing a USB device, hold down ■ 12 until "NO DEV" appears, and then turn off the unit or switch to other functions beforehand. Removing the USB device without performing these steps may corrupt the data on the USB device or damage the device itself.

Example of folder structure and playing order The playing order of the folders and files is as

follows. However, the playing order may differ from the original order on the USB device, depending on the recording method used.

Notes on the USB device

- It may take a long time before playback starts when: the folder structure is complex - the USB device is close to capacity.
- When a USB device is connected, the unit reads all the files on the device. If there are many folders or files on the device, it may take a long time for the unit to finish reading them.
- Do not connect a USB device to the unit through a USB • With some connected USB devices, after an operation is
- performed, there may be a delay before it is performed by • This unit may not support all the functions provided with
- a connected USB device. • Do not save non-MP3/WMA/AAC files or unnecessary
- folders to a USB device that contains MP3/WMA/AAC files • During playback, audio files other than MP3, WMA and AAC files are skipped even if those files are included in a

- **4** Press PRESET + or − 7 until the preset number for the station you want flashes on the display
- **5** Press ENTER **6** to store the station. If another station is already assigned to the selected preset number, that station is replaced

The preset radio stations remain in the unit's memory even The AC power cord is unplugged

Listening to preset radio stations

- 1 Press DAB/FM 13 repeatedly to turn on the radio function and select the "DAB" or "FM" band.
- **2** Press PRESET + or -7 to select a stored preset number for the desired radio station.

Using the Sleep Timer

You can set the unit to turn off automatically after a set time has elapsed.

The default setting ("90") appears and the "SLEEP" indicator lights up on the display. **2** Press SLEEP 14 repeatedly to select the

selected setting is confirmed automatically after

about 4 seconds. You can check the time left until the unit turns off by

pressing SLEEP 14 again after setting the sleep timer

minutes) changes on the display, and the

Connecting optional components

You can enjoy the sound from an optional component, such as a portable digital music player through the speakers of this unit. Be sure to turn off the power of each component before making any connections For details, refer to the instruction manual of the component to be connected

- 1 Connect the AUDIO IN jack 9 to the line output jack of the portable digital music player or other component using an audio connection cable (not supplied).
- 2 Turn the connected component on
- **3** Press AUDIO IN 13 and start playing sound on the connected component. The sound from the connected component is

output from the speakers. To connect the unit to a TV or video recorder/ player, use an extension cable (not supplied) with a stereo-mini jack on one end and two phono plugs on the other end.

Precautions

- Discs that this unit CAN play Audio CD (CD-DA*1 tracks)
- CD-R/CD-RW that contains MP3/WMA files and is finalized*2 correctly
- *1 CD-DA is the abbreviation for Compact Disc Digital Audio. It is a recording standard used for audio CDs.
- ² Finalizing is the process to make the CD-R/CD-RW discs playable on the consumer disc player products, and the finalizing can be enabled or disabled as optional settings

Discs that this unit CANNOT play

during disc creation in most recording software.

- CD-R/CD-RW other than those recorded in audio CD format or formats conforming to ISO 9660 Level 1/Level 2 or Joliet
- CD-R/CD-RW of poor recording quality, CD-R/ CD-RW with scratches or that is dirty, or CD-R/ CD-RW recorded using an incompatible recording
- CD-R/CD-RW that is unfinalized or finalized incorrectly

Notes on discs

- Clean the CD with a cleaning cloth if the disc is dirty. Wipe the disc from the center out. If there are scratches, dirt or fingerprints on the disc, a tracking error may occur.
- Do not use solvents such as benzine, thinner, commercially available cleaners or anti-static spray intended for vinyl LPs.
- sources such as hot air ducts, or leave it in a car parked in direct sunlight as there can be a considerable rise in temperature inside the car. • Do not stick paper or a sticker on the CD, or

• Do not expose the CD to direct sunlight or heat

scratch the surface of the CD • After playing, store the CD in its case

Note on DualDiscs

• A DualDisc is a two sided disc product which mates DVD recorded material on one side with digital audio material on the other side. However, since the audio material side does not conform to the Compact Disc (CD) standard, playback on this product is not guaranteed

Music discs encoded with copyright protection technologies

• This product is designed to playback discs that conform to the Compact Disc (CD) standard. Recently, various music discs encoded with copyright protection technologies are marketed by some record companies. Please be aware that among those discs, there are some that do not conform to the CD standard and may not be playable by this product

On safety

- As the laser beam used in the CD player section is harmful to eyes, do not attempt to disassemble the casing. Refer servicing to qualified personnel
- Should any solid object or liquid fall into the unit, unplug the unit, and have it checked by qualified personnel before operating it any further.
- Discs with non-standard shapes (e.g., heart, square, star) cannot be played on this unit. Attempting to do so may damage the unit. Do not use such discs

On power sources

- For AC operation, use the supplied AC power cord; do not use any other cord. • Unplug the unit from the wall outlet if it is not to
- be used for an extended period of time. • When not using the batteries, remove them to avoid damage that can be caused by battery

leakage or corrosion

- On placement • Do not leave the unit in a location near heat sources, in a place subject to direct sunlight excessive dust or mechanical shock, or in a car subject to the direct rays of the sun.
- Do not place the unit on an inclined or unstable
- surface • Do not place anything within 10 mm of the rear of the cabinet. The ventilation openings must be unobstructed for the unit to operate properly and prolong the life of its components.

Since a strong magnet is used for the speakers keep personal credit cards using magnetic coding or spring-wound watches away from the unit to prevent possible damage from the magnet.

On operation

• If the unit is brought directly from a cold to a warm location, or is placed in a very damp room moisture may condense on the lens inside the CD player section. Should this occur the unit will not operate properly. In this case, remove the CD and wait about an hour for the moisture to evaporate.

On handling the unit • Do not leave the CD compartment open to avoid

dust and debris contamination. On cleaning the cabinet • Clean the cabinet, panel and controls using a soft

cloth slightly moistened with a mild detergent

solution. Do not use any type of abrasive pad.

scouring powder, or solvent, such as alcohol or

If you have any questions or problems concerning your unit, consult your nearest Sony dealer.

Troubleshooting

General

- The power does not turn on. Make sure the AC power cord is connected to the
- wall outlet securely.
- Make sure the connector of AC power cord is inserted into the AC IN jack securely.
- Check if the batteries are inserted correctly matching the polarities.
- Replace all the batteries with new ones when the OPR/BATT indicator 15 dims.

There is no sound.

- the music or sound source you want to listen to.
- Make sure the appropriate function is selected for Unplug the headphones when listening through

The sound is noisy. • Is someone using a mobile phone or other equipment emitting radio waves near the unit? If so, move the unit away from such devices.

A small humming noise is heard.

• This is not a malfunction. You may hear a small humming noise depending on the status of the power supply

"NOT IN USED" appears.

You pressed an invalid button

CD/MP3/WMA player

The CD player does not play even when a CD is in place.

- Place the CD with the label side up.
- Clean the CD. • Take out the CD and leave the CD compartment
- open for about an hour to dry moisture condensation • The CD-R/CD-RW is blank or unfinalized.
- There are no playable MP3/WMA files on the disc. • There is a problem with the quality of the CD-R/ CD-RW, recording device or application software.
- If the CD-R/CD-RW has been recorded on a PC, it needs to be finalized. • Replace all the batteries with new ones when the

OPR/BATT indicator 15 dims "NO CD" appears when the disc is loaded.

- No disc is set in the CD compartment. Set a disc. The CD may have a reading problem. Replace the
- The CD may be placed upside down. Place the disc with the label side up • An unplayable disc (DVD, BD, etc.) is loaded.

"NO TRACK" appears on the display when the disc is loaded.

- "DISC ERR" appears when the disc is loaded.
- The CD may be dirty. Clean the disc. • The CD may have scratches. Replace the disc. • The CD may have a reading problem. Replace the

• No audio files recorded in supported formats, or a

file to be played back has an unsupported file

• A blank disc may be set in the CD compartment

- The sound drops out.
- Clean the CD, or replace it if the CD is badly damaged. Place the unit in a location free from vibrations.

• Clean the lens with a commercially available

• The sound may drop out or noise may be heard when using a poor quality CD-R/CD-RW or if there is a problem with the recording device or

Starting playback takes more time than usual. • The following discs take a longer time to start

playback. - A disc recorded with a complicated tree structure. - A disc that has many folders or non-MP3/WMA

USB device

application software.

The USB device does not work properly.

- If you connect an incompatible USB device, the following problems may occur. - The USB device is not recognized.
- File or folder names are not displayed on this

- The sound skips -There is noise. - The sound output is distorted.

- Playback is not possible

"NOT SUPPORT" appears.

• An unexpected error occurs in the connected device. An unknown device is connected.

• An unsupported USB device is connected and

playback or pause operation is performed.

"OVER CURRENT" appears and the unit turns off automatically.

electrical current from the \$\foat{4}\$ (USB) port \$11\$. In this case, remove the USB device from the \(\frac{\psi}{(USB)} \) port 11 and reconnect the USB device, and then turn on the unit again. If this problem persists after turning on the power of the unit, contact your

An abnormal level has been detected in the

pearest Sony dealer. There is no sound.

 The USB device may be connected incorrectly. Turn of the unit and reconnect the USB device. Then turn on the unit.

There is noise skipping, or distorted sound.

• Turn off the unit and reconnect the USB device.

Then turn on the with again

• The music data itself contains noise, or the sound is distorted. Noise may have entered during the creation of audio files. Try occeating audio files

The USB device cannot be competed to the ∜ (USB) port 11.

and use them to play on this unit

• The connector on the USB device or the BB cable is being inserted backwards. Insert it to the Ψ (USB) port 11 in the correct direction.

time, or it takes a long time before playback

• The reading process can take a long time in the following cases -There are many folders or files on the USB

"READING" is displayed for an extended

- device.
- The file structure is complex. The memory is almost full.
- The internal memory is fragmented To avoid the above problems, we recommend that you adhere to the following guidelines:
- Keep the total number of folders on a USB device to 100 or less – Keep the total number of files per folder to 100

Erroneous display

• The data stored on the USB device may be corrupted. Send the music data to the USB device • This unit can display only numbers and letters of

the alphabet. Other characters will not be

The USB device is not recognized. • Turn off the unit and reconnect the USB device, then turn on the unit.

• The USB device is not functioning properly. Refer

to the USB device operation manual for details on how to deal with this problem

Play does not start.

Play does not start from the first track. • Set the play mode to Normal Play.

MP3/WMA/AAC files cannot be played

• Turn off the unit and reconnect the USB device

- The audio files may have inappropriate file extensions. The file extensions supported by this
- unit are as follows: - MP3: file extension ".mp3"

- WMA: file extension ".wma"

- AAC: file extension ".m4a," ".3gp" and ".mp4" • The audio files may have been created in formats other than MP3/WMA/AAC formats
- The USB storage device uses a file system other than FAT16 or FAT32.* • The files are encrypted or protected by passwords

* This unit supports FAT16 and FAT32, but some USB storage

For details, refer to the operation manual of the USB storage device in question or contact the manufacturer

The sound is weak or reception is poor. Replace all the batteries with new ones.

media may not support both file systems

 Move the unit away from nearby TVs. • Extend the antenna to its full length, and reorient it for best reception. • If you are in a building, listen near a window.

• If a mobile phone is placed close to the unit, a

loud noise may be heard from the unit. Keep the phone away from the unit. The TV picture is unstable.

the DAB auto tune manually").

 If you are listening to an FM program near a TV with an indoor antenna, move the unit away from

DAB/DAB+ radio stations are not received • Perform the DAB auto tune procedure (see "To run

• The current DAB/DAB+ service may not be

available. Press TUNE + or — 8 to select a

different service. • If you have moved to another area, some services/frequencies may have changed and you may not be able to tune to your usual broadcast. Perform the DAB auto tune procedure to

re-register the contents of broadcasts. (Performing

this procedure clears all previously stored presets.

After trying the suggested remedies, if the problem persists, unplug the AC power cord or remove all the batteries. After all the indications on the display disappear, plug in the AC power cord again, or re-insert the batteries. If the problem persists, consult your nearest Sony dealer.
